SB363 Sidelifter

FEATURES

Centralised valving decreases maintenance and spare part requirements.

Slim profile cranes and stabilisers utilising light weight materials for reduced weight without compromising strength & durability.

Stabiliser options include **Tilt** and **Extend** and **Bridge Leg**. The **SB363 Bridge Leg** has angle in feature which is ideal when placing containers close to the wall.

SMARTlift II monitoring and control system delivers a user friendly experience with high resolution colour screen, clear messages and simple diagnostics and maintenance.
