

KEEP YOUR NEW LOGLIFT RUNNING SMOOTHLY WITH HIAB SERVICES

The next generation of LOGLIFT forestry cranes has arrived. Easy to operate and service, and designed for comfortable operation, new LOGLIFT cranes are a profitable, future-proof investment made for the next generation of operators.

The next generation of LOGLIFT now has the next generation of service available. With these new forestry cranes comes the first complete Hiab ProCare™ services offering for LOGLIFT. In addition all cranes are connectivity-ready for Hiab HiConnect™. The next generation has truly arrived!

It must work out in the forest

Forestry is a tough business that requires tough equipment. Extreme weather conditions, rugged environments and isolated locations require equipment works as designed. We understand these challenges and can offer LOGLIFT owners and operators service that delivers beyond expectations. We will support your LOGLIFT throughout its lifecycle and maintain original performance levels and reliability.

Your smart investment, protected

Secure original performance for your LOGLIFT forestry crane with Hiab ProCare™. Regular preventative maintenance checks and scheduled inspections will keep your LOGLIFT in top shape, so you can maximise uptime and deliver more. Repair services and extended warranty protection will safeguard your investment and ensure continued superior performance.

PROCARE SERVICE AGREEMENTS

Complete

Complete – a complete service package for total peace of mind. Preventative maintenance and repair services will help keep up the original performance of your LOGLIFT crane.

Essential

Essential – service will keep your LOGLIFT in excellent condition. This preventative maintenance programme removes the stress of unforeseen problems.

Extended Warranty

Extended Warranty – an additional 1-year extension of our standard warranty that safeguards maximum performance and helps you avoid costly repairs and downtime for one extra year.

Stay one step ahead with Hiab HiConnect™

Hiab HiConnect™ enhances the productivity of your business through your connected LOGLIFT equipment. You get real-time insights into equipment utilisation, operation, and condition. This data can be used to actively optimise performance and safety and avoid unnecessary downtime. Web-based dashboards with clear and simple overviews provide status monitoring, service planning, and help improve the operation of each unit and operator.

Data is buffered in the crane during operation and can be downloaded when feasible.

Smart, fast and guaranteed quality – all in one kit

Hiab service kits ensure maximum uptime. Based on the most common maintenance needs and customer requests, Hiab service kits are specifically built according to the exact standards and requirements for your LOGLIFT. They focus on preventative maintenance and always use original LOGLIFT parts to ensure the same level of operation for your investment long after the purchase date. Hiab service kits minimise service downtime and keep your business operations running at full speed.

A global network of service experts

Hiab's global service network covers more than 100 countries and delivers support when and where you need it. Most importantly it is probably close to you. Our service technicians are the best in their field, with extensive product knowledge, and commitment to quality and safety. Get professional care from one of our service centres or a service partner to keep your LOGLIFT running at peak performance.
