

iQ.958 HI PRO

90TM RANGE CRANE

THE CRANE DESIGNED FROM THE FUTURE

HIAB iQ.958 HIPRO represents the best balance point between performance, everyday use and high level of innovation content.

This 90tm range leader crane has been designed to fit an 'allrounder' use, delivering that vertical and horizontal lifting capability that suits different types of jobs on a daily basis.

This model is a modern and well balanced loader crane, designed from the very beginning with an integrated approach.

Progress in performance

What characterizes this model is the long reach, with horizontal and vertical high performance capabilities that are the result of a design tailored for this use without compromises.

The HIAB iQ.958 HiPro excels in the performance of the 8 extension variant with the JIB 6 extensions, reaching that optimal lifting figure that outbeats competition.

Driven by the end applications for which it was developed, key factors such as weight and frame size were considered crucial from the very beginning of the design phase.

Progress in installation and stabilisation

The built-in space of the E-8 with JIB stays under the 2 meter sectional dimension.

With the widest stabiliser span in the range, we go up to 9 meters and the smaller stabiliser in the rear, particularly stiff, minimizes the total weight and improves the approachable lifting area. By choosing the subframe, stabiliser and crane all within the 5m span in the rear, this allows to keep the cargo very close to the truck and at the same time increase its overall load capacity.

Progress in innovation

The innovative lightweight design, the addition of the optional Cyclone tank and the overall compact frame size, assure customers more space left for transporting materials related to their business.

This useful payload allows reducing going back and forth from the warehouse for moving materials, which translates into further fuel consumption savings, contributing to your businesses' bottomline.

ENGINEERED TO PERFECTION

The innovative V12-Power boom shape, for both the crane and JIB, is the result of Hiab's engineering department to develop products that are suited for the application they are going to be used for. The uncompromised design delivers the highest level of heavy lifting performance in a crane of this category.

V12
POWER

A layout and options for a wide variety of uses

Choose among several options or architecture layouts to best fit your needs.

- Variants with 8 or 9 extensions in combination with JIB 6 extensions.
- 10 hydraulic extensions (not in combination with the use of the JIB).
- JIB 155-Q (V12-Power profile shape, E6 with additional manual extension).
- Raised hook extension.
- 3,5t Hoist.
- Ready to go preparation with Hiab FrameWorks installations and solutions division proposals.
- nDurance nanotechnology based coating for long lasting protection, resisting all weather conditions and guaranteeing higher residual value.

Description	Unit	E-8	E-9	E-10
Max lifting movement	kNm/kgm	757/7427	748/7334	743/7284
Slewing arc	(°)	endless	endless	endless
Slewing capacity – Max slope	%	7	7	7
Max oil delivery	l/min	140	140	140
Oil cyclon tank capacity	l	190	190	190
Oil tank capacity	l	300/400	300/400	300/400
Weight of the crane (+/- 2%)	kg	8750	8965	9140

DRIVING THE CRANE OF THE FUTURE

At the forefront of one of the most advanced operating experiences of handling a crane, is the evolution of the control system: the new SPACEevo builds on the strong Hiab legacy in terms of precision, speed and delicate movements which customers highly appreciate and benefit from during daily operations.

“iQ” range of loader crane models are the step into the future of intelligent lifting equipment.

Long lasting value

SPACEevo is an open and modular platform, that allows to add and create new functionalities over time, assuring the HIAB iQ.958 HIPRO a long lasting operating time over the years and a higher residual value. The dual-core processor, the sensors, the actuators and the new harness design assure working in all conditions, giving power to the crane it needs, while increasing its reliability and durability for completing the most difficult jobs.

CD4 (CombiDrive4)

The remote of the future

DISPLAY: Excellent control over the crane movements; data and alerts clearly readable with the new three big color displays.

PERSONALIZATION: A personalized control setting for each operator, with the use of individual batteries where the settings can be stored in the memory function so that each driver can best work according to his preferences: for example crane speed.

CONTROL: The extended battery life, the haptic feedback and the new signals complete the facility of use for the operator.

Handling a HIAB crane has never been easier, the most skilled operators will appreciate the precise and detailed movements of the crane, while those with less experienced can be assisted in handling the loads in total safety and by reducing the complexity of the operations.

Discover some of the many advanced functions:

EXTRA SAFETY with Confirm View

With the introduction of the next generation remote control CD4, the crane detects on which side the operator is compared to the crane, and it enables him to activate the stabilizers in full safety and with the complete view of their opening.

Dynamics Load Charts (DLC-S)

Preemptive stabilization simulation function, allowing to reduce setup time and improve operator comfort from the remote control.

Variable Stability Logic Plus (VSL+)

VSL+ is a safety system that maximises capacity by calculating the stability according to the position of the stabiliser legs and the total weight of the truck. By accounting for the true load, it can provide significantly more lifting capacity when it really matters.

HiConnect ready

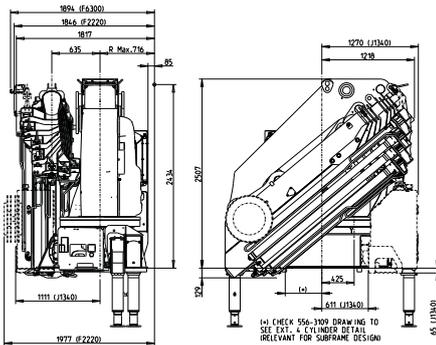

Digitalisation and connectivity give you an added edge over competition, by handling and managing your crane, or fleet of cranes. Making decisions based on data driven information allows you to manage the daily workload and plan pre-emptively your maintenance schedules minimising downtimes.

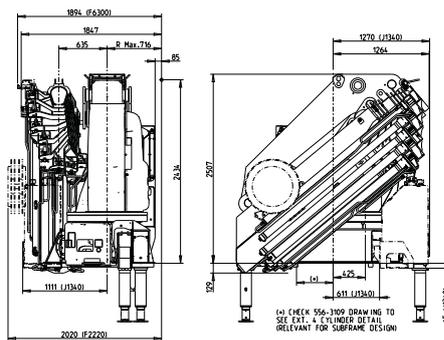

AN INTEGRATED DESIGN, WHERE ALL PARTS PLAY AS 'ONE'

The HIAB iQ.958 HIPRO's balanced performance is the result of all the structural and control parts working together; as the design of the whole system (components, hydraulics, valves, electronics, stabilisers and cables and harness) has been thought to work altogether from the very beginning rather than the addition of independent parts.

KEEP YOUR BUSINESS MOVING WITH HIAB SERVICES

When you invest in Hiab equipment, you invest in quality performance to safely and efficiently fulfil your commitments to your customers – every single day. With Hiab Services you have access to the latest tools and connectivity solutions, quality parts and global network of experts to support you throughout your equipment's entire lifecycle, giving you the uptime and reliability you need to keep your business moving.

Original Parts

Hiab Original Parts ensure that your Hiab product stays a Hiab product. Keep the same functionality and quality you invested in from the start – essential for optimal performance, maximum safety and avoiding costly downtime.

HIAB PROCARE™

Hiab ProCare is a flexible service contract designed to secure the uptime of all Hiab equipment by reducing the risk of costly breakdowns and unexpected downtime. Choose between Extended warranty, Essential or Total R&M (Repair & Maintenance) depending on the options and level of service that best suit your needs.

Hiab ProCare brings you even more peace of mind by reducing total cost of ownership and increasing the resale value of your machine. Let us take care of all scheduling, maintenance and inspections to help ensure that your equipment retains the same high quality you invested in. To see how Hiab Procare can work for you, please contact your local Hiab office in your country.

BUILT TO PERFORM

Hiab is a leading provider of smart and sustainable load handling solutions. We are committed to delivering the best customer experience every day with the most engaged people and partners. Hiab's premium equipment includes HIAB, EFFER and ARGOS loader cranes, MOFFETT and PRINCETON truck mounted forklifts, LOGLIFT forestry cranes, JONSERED recycling cranes, MULTILIFT skiploaders and hooklifts, GALFAB roll-off cable hoists, and tail lifts under the ZEPRO, DEL and WALTCO brands. As the industry pioneer, Hiab continues to make load handling smarter, safer and more sustainable to build a better tomorrow.

Hiab is part of Cargotec Corporation.
